

The annual power generation of wind farms hits a new high

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, ...

Electricity generation from wind established a new record in the United States in April, and wind generation exceeded coal-fired generation in both March and April, data from our July 2024 ...

The world installed 117 gigawatts of new wind power capacity in 2023, a 50 per cent increase from the year before, making it the best year for new wind projects on record, ...

Global wind electricity generation in the first nine months of 2024 has only climbed around 7% versus the same period in 2023, according to energy think tank Ember. But historical ...

While global growth slightly slowed, the steady and inspiring rise of wind power in countries like China and Brazil gives us renewed optimism. China, in particular, has shown ...

Texas leads in installed wind capacity (41 GW), followed by Iowa (13 GW) and Oklahoma (12.6 GW). 7 Texas (1,323 MW) and Illinois (928 MW) installed the most new wind capacity in 2023. 7 Iowa ...

A record-breaking 117GW of new wind energy capacity was added globally in 2024, according to the latest Global Wind Report from GWEC. Despite this impressive growth, the report highlights ...

A new Berkley Lab analysis finds that despite an expected future reduction in the number of turbines per power plant, the total estimated annual energy output of wind plants will increase due ...

The world installed 117 gigawatts of new wind power capacity in 2023, a 50 percent increase from the year before, making it the best year for new wind projects on record, according to a ...

The world installed 117 gigawatts of new wind power capacity in 2023, a 50% increase from the year before, making it the best year for new wind projects on record, according to a new report by the ...

The annual power generation of wind farms hits a new high
