

# The first round of microgrid outbreak

Given the nascent nature of research on the human dimensions of microgrid development, our main research question is as follows: How do communities respond to microgrid proposals? To ...

By sidestepping the need for a central controller and its need for communication in a microgrid configuration, NREL has developed a simpler path for deploying microgrids quickly.

November 3 - Microgrids are being developed across the U.S. as new data centers drive up power demand and companies and communities seek reliable power supplies and protection against ...

This report highlights the objective of the NY Prize microgrid feasibility studies, provides background on the technical approach used in the analysis, and also outlines fundamental considerations for ...

Pacific Gas & Electric has announced the first round of funding available through the Microgrid Incentive Program in its northern California service territory.

In Sacramento, an on-site reliable 400kW fuel cell microgrid project was installed at the Sleep Train Arena to support the critical service and 100 hospital beds during the COVID-19 pandemic.

After relying on costly and highly polluting diesel generators for nearly half a year following Maria, local businesses and community groups came together to build a cooperatively ...

If a community chooses to adopt a phased approach, it is important to procure equipment and design the first phase with this in mind since not all microgrid architectures or controller sets are modular or ...

In late April, a massive power outage swept across parts of Spain and Portugal. Within minutes, trains stopped, flights were grounded, and critical services were knocked offline.

About three years ago, a microgrid powered by solar, battery energy storage and diesel back-up generator was installed to serve a hotel and casino. During the outbreak, the microgrid supported ...
