Explore the future of solar in 2025--key trends, new tech, and policies driving global clean energy growth.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Browse over 400 job profiles by sector with a full breakdown of salary, responsibilities and required qualifications so that you can find the perfect graduate job.

Prospects guides students and graduates every step of the way. Explore courses, find jobs, and get expert guidance.

Explore the Year 12 work experience programmes for A-level students at school or college, with opportunities in 2026 from the UK's biggest recruiters.

Whether you choose to find a job or begin postgraduate study, there are a number of routes you can take after university. Explore your career options and see where your degree could take you.

Claire Toogood from AGCAS outlines the findings of a report on the priorities for careers and employability services in 2025.

Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 - double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

This review examines the evolution, current advancements, and future prospects of PV systems, highlighting the development of various photovoltaic cell technologies, including crystalline ...

Furthermore, greater subsidies should be provided for residential solar generators over utility-scale generators. In this article, we provide a global scenario with regard to solar energy ...

growth and success in the solar photovoltaic power generation market. As the world's largest energy consumer, China's commitment to renewable energy and its pursuit of a more sustainable energy ...

The prospects of solar power generation

There is no doubt that solar power has become the driving force of the global energy transition. Looking ahead, however, there remain challenges that must be addressed for solar to ...

MA Money, Governments and Central Banks University of Buckingham Department of Economics and International Studies MA by research

This study not only deepens our understanding of existing methodologies but also provides valuable insights for future advancements in solar power generation forecasting.
