

Togo's new energy solar power generation for home use

Developed by Meridiam and Électricité de France (EDF), the project is integral to achieving Togo's 2030 goal of installing 200 MWp of renewable energy capacity, enhancing the ...

Togo has launched the "Café Lumière" initiative, a solar-powered community electrification scheme, in a bid to accelerate progress towards universal energy access. The pilot phase was ...

Solar energy stands out as a key renewable resource driving the transition towards sustainable electricity in Togolese households. The country's abundant sunlight makes solar panels ...

Togo's new solar farm, co-developed by EDF and Meridiam with support from AfDB, SEFA, and Proparco, will generate 87 GWh of clean electricity annually - strengthening energy ...

Find out how Togo is accelerating its energy transition with a 62 MWp solar power plant in Sokodé, supported by the African Development Bank and its partners.

(Togo First) - Togo is preparing to launch an ambitious 400-megawatt (MW) solar energy development project as part of its strategy to achieve universal access to electricity by 2030. Last ...

The Kpalassi solar project is integral to Togo's energy transition strategy. It is expected to produce enough electricity to power approximately 700,000 households, significantly reducing the ...

This initiative reflects the coherence and continuity of President Faure Gnassingbé's long-standing commitment to making Togo a model of sustainable development in West Africa. It ...

This plant, the largest in West Africa, uses solar tracking technology that maximizes panel efficiency. It significantly contributes to reducing CO2 emissions, with more than one million tons ...
