

## Two sets of 48v lithium batteries make 72v

When considering connecting multiple 48V lithium battery packs, we have two primary connection methods: series and parallel. Each method has its own advantages and considerations.

I got 72V 1500W 45Amax controller and 48v 1000W brushless hub motor. I've been using another sla 72v 8ah battery back for almost a year now without any problems, but it is still very heavy.

Anyone know how to connect 2 lime bike battery"s together to make 72v Connecting two lime bike batteries to make 72v, discussion involves series and...

As for 48v vs 72v you can do either. Both have plenty of accessories available. There are far more 48v options out there for accessories/batteries/controllers/motors than 72v but both absolutely exist.

The navitas kit I have is capable of running 48v or 72v the motor is an ac motor so the controller converts the dc power to ac for the motor, So instead of going 33mph I should hopefully be ...

The battery is designed for 3500+ charge cycles, offering more than double the lifespan of traditional lead-acid batteries. Complete Lithium Conversion Kit: This kit comes with everything you need to ...

If you have two sets of batteries connected in series, you can wire both sets into a parallel connection to make a series-parallel battery bank. In the images below we will walk you through the ...

Connecting multiple lithium batteries in a golf cart involves series or parallel wiring to match voltage and capacity requirements. For example, two 36V LiFePO4 batteries in series create a 72V system, while ...

A comprehensive guide to mixing different capacity lithium batteries. Dive into the crucial aspects of voltage, BMS, fuses, and more.

How are you doing the conversion, with 1 BMS or with 2? One probably entails new cells, BMS, case and mount (and controller and/or display?), for all that it might be worth investing in all ...
