

# Two solar panels for home installation

How do I connect multiple solar panels together in series?

How to connect multiple solar panels together in series: Connect the positive (+) cable of one panel to the negative (-) one of the next panel. The female MC4 connector marks a positive cable and the male MC4 is the negative. Continue with the rest until all panels are connected.

How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How to connect solar panels?

Here are the different methods of connecting solar panels. To connect solar panels in series, wire the positive terminal of the first module to the negative terminal of the second panel and the positive terminal to the negative terminal of the third panel.

Are solar panels easy to install?

Most modern solar panels are relatively easy to install for someone with basic to intermediate DIY skills. However, if you're installing a PV module array with more than 2 or 3 panels, it is typically best to work with a professional.
