

Wind turbines turn even without wind

Can a wind turbine rotate without wind, or is this some kind of renewable energy magic trick? Let's unravel this mystery with science, humor, and a dash of "did you know?";

Once a turbine is going, it can take hours to slow back down, and that could explain why they are turning without wind. They could also be drawing power from the grid to rotate the blades during cold periods ...

Discover how new hybrid technologies and bladeless wind turbines make it possible to generate wind energy even without wind, improving performance and sustainability.

However, it has been demonstrated that wind turbines can meet ...

Freestanding wind turbines are more expensive to install, but they're much more effective if you're serious about going fully renewable or perhaps even benefitting from the Feed-in Tariff.

We dug around in some state, federal and industry reports and reached out to academic experts in energy technology to determine why some turbines in a wind farm spin while others remain...

Curious about how wind turbines work when there's no wind? This article explains how turbines generate electricity, even when it's not windy outside!

No, wind turbines do not generate electricity when it's not windy. They also don't generate electricity when the wind speed drops below what's called the "cut-in-speed". That's the minimum wind speed ...

Wind turbines require wind to operate, but they can also turn due to residual motion after being activated, which can persist for hours even in light breezes. Unlike windmills, which utilize wind ...

Wind power plays a pivotal role in this debate. Wind power is a "form of energy conversion in which turbines convert the kinetic energy of wind into mechanical or electrical energy ...

Once a turbine is going, it can take hours to slow back down, and ...

However, it has been demonstrated that wind turbines can meet our energy needs even without wind through a combination of energy storage, grid integration, low wind technology, hybrid systems, and ...
